

AEGIS® Single Shot Resins

LIQ2060

AEGIS® Single Shot Extreme II Resin (25 Pack)

Ultra-thin resin (20 cps) with excellent flow properties to fill the most stubborn breaks and especially ones with fine, extended cracks. It also excels with most breaks in cold weather. Each Single Shot contains 0.5 mL of resin. Requires Mylar squares for curing. Non-yellowing, cures optically clear.

LIQ2070

AEGIS® Single Shot Crack Fill Resin (25 Pack)

Medium viscosity resin (40cps), works well as a general-purpose resin for cracks, stars, and combination breaks. Excellent for repairs in moderate to cool weather. Each Single Shot contains 0.5 mL of resin. Requires Mylar squares for curing. Non-yellowing, cures optically clear.

LIQ2080

AEGIS® Single Shot Polymer II Resin (25 Pack)

Thicker viscosity resin (80cps) is hard to beat for bull's-eyes and combination breaks without radiant cracks. It is also a great option for repairs in hot weather. Each Single Shot contains 0.5 mL of resin. Requires Mylar squares for curing. Non-yellowing, cures optically clear.
